

NY FORWARD SAFETY PLAN TEMPLATE

Each business or entity, including those that have been designated as essential under Empire State Development's Essential Business Guidance, must develop a written Safety Plan outlining how its workplace will prevent the spread of COVID-19. A business may fill out this template to fulfill the requirement, or may develop its own Safety Plan. **This plan does not need to be submitted to a state agency for approval** but must be retained on the premises of the business and must be made available to the New York State Department of Health (DOH) or local health or safety authorities in the event of an inspection.

Business owners should refer to the State's industry-specific guidance for more information on how to safely operate. For a list of regions and sectors that are authorized to re-open, as well as detailed guidance for each sector, please visit: forward.ny.gov. If your industry is not included in the posted guidance but your business has been operating as essential, please refer to ESD's [Essential Business Guidance](#) and adhere to the guidelines within this Safety Plan. Please continue to regularly check the New York Forward site for guidance that is applicable to your business or certain parts of your business functions, and consult the state and federal resources listed below.

COVID-19 Reopening Safety Plan

Name of Business:

Middletown Park Rehabilitation and Health Care Center; Park Manor Acquisition II

Industry:

Skilled Nursing Facility

Address:

121 Dunning Road, Middletown, NY 10940

Contact Information:

845-343-0801

Owner/Manager of Business:

Eileen Masterson, LNHA

Human Resources Representative and Contact Information, if applicable:

I. PEOPLE

A. Physical Distancing. To ensure employees comply with physical distancing requirements, you agree that you will do the following:

- Ensure 6 ft. distance between personnel, unless safety or core function of the work activity requires a shorter distance. Any time personnel are less than 6 ft. apart from one another, personnel must wear acceptable face coverings.

- Tightly confined spaces will be occupied by only one individual at a time, unless all occupants are wearing face coverings. If occupied by more than one person, will keep occupancy under 50% of maximum capacity.

- Post social distancing markers using tape or signs that denote 6 ft. of spacing in commonly used and other applicable areas on the site (e.g. clock in/out stations, health screening stations)
- Limit in-person gatherings as much as possible and use tele- or video-conferencing whenever possible. Essential in-person gatherings (e.g. meetings) should be held in open, well-ventilated spaces with appropriate social distancing among participants.
- Establish designated areas for pick-ups and deliveries, limiting contact to the extent possible.

List common situations that may not allow for 6 ft. of distance between individuals. What measures will you implement to ensure the safety of your employees in such situations?

examples:

- Providing care and treatment for residents
- Passing each other in the hallways

Personnel will wear appropriate personal protective equipment (PPE) such as face masks and eye protection at all times. +

How you will manage engagement with customers and visitors on these requirements (as applicable)?

- Post the requirements in visible areas
- Post the requirements on the facility social media page
- Mail the requirements to the resident representatives
- Facility personnel will be educated on the requirements
- Utilize social distancing markers
- Have hand hygiene supplies and PPE readily available +

How you will manage industry-specific physical social distancing (e.g., shift changes, lunch breaks) (as applicable)?

- Post social distancing markers in applicable areas
- Personnel wear appropriate PPE
- Educate personnel and monitor compliance via random audit

II. PLACES

A. Protective Equipment. To ensure employees comply with protective equipment requirements, you agree that you will do the following:

- Employers must provide employees with an acceptable face covering at no-cost to the employee and have an adequate supply of coverings in case of replacement.

What quantity of face coverings – and any other PPE – will you need to procure to ensure that you always have a sufficient supply on hand for employees and visitors? How will you procure these supplies?

- The facility utilizes approximately 300 face masks a day. Face masks are procured through the facility corporate ownership, through vendors and, as needed, requests are made via the county office of emergency management (OEM). The facility maintains an emergency preparedness stock supply of PPE and this is noted on the daily HERDS survey.

- Face coverings must be cleaned or replaced after use or when damaged or soiled, may not be shared, and should be properly stored or discarded.

What policy will you implement to ensure that PPE is appropriately cleaned, stored, and/or discarded?

- The facility has a policy regarding PPE and extended use, re-use, proper cleaning, storage, and, replacement and discarding of such equipment.
- The facility educates employees on the above policy.

- Limit the sharing of objects and discourage touching of shared surfaces; or, when in contact with shared objects or frequently touched areas, wear gloves (trade-appropriate or medical); or, sanitize or wash hands before and after contact.

List common objects that are likely to be shared between employees. What measures will you implement to ensure the safety of your employees when using these objects?

- These items include, but are not limited to: Vital sign machines, blood pressure cuffs, oxygen concentrators, mechanical patient lifters, wheelchairs, kitchen carts etc.
- Shared items are disinfected between use. Single use items are discarded after single use.

B. Hygiene and Cleaning. To ensure employees comply with hygiene and cleaning requirements, you agree that you will do the following:

- Adhere to hygiene and sanitation requirements from the [Centers for Disease Control and Prevention](#) (CDC) and [Department of Health](#) (DOH) and maintain cleaning logs on site that document date, time, and scope of cleaning.

Who will be responsible for maintaining a cleaning log? Where will the log be kept?

- The Director of Housekeeping
- The logs will be kept in the office of the Director of Housekeeping.

- Provide and maintain hand hygiene stations for personnel, including handwashing with soap, water, and paper towels, or an alcohol-based hand sanitizer containing 60% or more alcohol for areas where handwashing is not feasible.

Where on the work location will you provide employees with access to the appropriate hand hygiene and/or sanitizing products and how will you promote good hand hygiene?

- All employees have been educated and re-educated on hand hygiene practices.
- Hand hygiene dispensers are located in all common areas, all patient rooms, entrances, break room, and bathrooms.

- Conduct regular cleaning and disinfection at least after every shift, daily, or more frequently as needed, and frequent cleaning and disinfection of shared objects (e.g. tools, machinery) and surfaces, as well as high transit areas, such as restrooms and common areas, must be completed.

What policies will you implement to ensure regular cleaning and disinfection of your worksite and any shared objects or materials, using [products](#) identified as effective against COVID-19?

- The facility uses cleaning and disinfectant products that NYS registered disinfectants based on EPA list for use against sars cov-2
- The facility has a policy for cleaning and disinfecting of the environment

C. Communication. To ensure the business and its employees comply with communication requirements, you agree that you will do the following:

- Post signage throughout the site to remind personnel to adhere to proper hygiene, social distancing rules, appropriate use of PPE, and cleaning and disinfecting protocols.
- Establish a communication plan for employees, visitors, and customers with a consistent means to provide updated information.
- Maintain a continuous log of every person, including workers and visitors, who may have close contact with other individuals at the work site or area; excluding deliveries that are performed with appropriate PPE or through contactless means; excluding customers, who may be encouraged to provide contact information to be logged but are not mandated to do so.

Which employee(s) will be in charge of maintaining a log of each person that enters the site (excluding customers and deliveries that are performed with appropriate PPE or through contactless means), and where will the log be kept?

- The Director of Nursing maintains the logs and the logs are stored in the DON office.

- If a worker tests positive for COVID-19, employer must immediately notify state and local health departments and cooperate with contact tracing efforts, including notification of potential contacts, such as workers or visitors who had close contact with the individual, while maintaining confidentiality required by state and federal law and regulations.

If a worker tests positive for COVID-19, which employee(s) will be responsible for notifying state and local health departments?

- The Director of Nursing (DON) will notify state and local health departments.

III. PROCESS

A. Screening. To ensure the business and its employees comply with protective equipment requirements, you agree that you will do the following:

- Implement mandatory health screening assessment (e.g. questionnaire, temperature check) before employees begin work each day and for essential visitors, asking about (1) COVID-19 [symptoms](#) in past 14 days, (2) positive COVID-19 test in past 14 days, and/or (3) close contact with confirmed or suspected COVID-19 case in past 14 days. Assessment responses must be reviewed every day and such review must be documented.

What type(s) of daily health and screening practices will you implement? Will the screening be done before employee gets to work or on site? Who will be responsible for performing them, and how will those individuals be trained?

- Health screening occurs upon the employee's arrival. Designated and trained facility personnel perform the employee health screenings. The screenings include a temperature check, questions regarding symptoms and recent travel. If any personnel fails the screening, that person is sent home and a follow up call is place by human resources.

If screening onsite, how much PPE will be required for the responsible parties carrying out the screening practices? How will you supply this PPE?

- Face masks are required and are supplied from house stock.
- Protective eyewear is required in the form of goggles, protective glasses or face shields

B. Contact tracing and disinfection of contaminated areas. To ensure the business and its employees comply with contact tracing and disinfection requirements, you agree that you will do the following:

- Have a plan for cleaning, disinfection, and contact tracing in the event of a positive case.

In the case of an employee testing positive for COVID-19, how will you clean the applicable contaminated areas? What products identified as effective against COVID-19 will you need and how will you acquire them?

- Areas will be cleaned with an approved disinfectant
- The facility acquires this through its vendors

In the case of an employee testing positive for COVID-19, how will you trace close contacts in the workplace? How will you inform close contacts that they may have been exposed to COVID-19?

- Contact tracing will be done to determine residents and staff who had contact with that employee and the appropriate notifications will be made to involved parties

IV. OTHER

Please use this space to provide additional details about your business's Safety Plan, including anything to address specific industry guidance.

- The facility will follow Department of Health and other applicable guidelines to determine policies and procedures in maintaining safe standards of practice for its personnel, residents, and visitors.
- Visitation of residents will be limited to outdoor areas, weather permitting
- Visitation indoors will take place in designated areas
- Visitation days and times will be determined by the facility and will be limited as per facility operational needs and personnel available to monitor visits.
- Visitors will be screened upon arrival and will have a rapid antigen test done and await the negative test result prior to the visit
- Visitors will wear the appropriate PPE at all times while visiting and visitors will stay in the assigned visitation area
- Visitation days and times will be subject to change based on personnel available to monitor visits.
- Visitation will take place by pre-arranged appointments which designated facility managers, social workers will coordinate.

Staying up to date on industry-specific guidance:

To ensure that you stay up to date on the guidance that is being issued by the State, you will:

- Consult the NY Forward website at [forward.ny.gov](https://www.forward.ny.gov) and applicable Executive Orders at [governor.ny.gov/executiveorders](https://www.governor.ny.gov/executiveorders) on a periodic basis or whenever notified of the availability of new guidance.
